THE SAMOAN SCARE

Little Faith Placed in the Reported Fight.

Blaine Says the Story is Probably a Canard.

Naval Officers at Washington Take the Same View.

No Further Information Received from the Islands-The Rumor, Although Discredited, Causing Much Uneasiness.

B. Telegraph to The Times.
NEW YORK, March 9.—[By the Associated Press.] The Herald of this morning prints three columns of comment relative to the reported blowing up of the United States ship Nipsic at Samoa by the German cruiser Oiga. This report, printed in the Herald of March Sth, as a dispatch from Breslau, where information of such an enounter was first printed, is the basis of nuch comment, according to the Herald, in Washington, where its correspondent interviewed naval officers with the results printed in the Herald this morning and from which the following epitomization is made: Commodore Steard has no knowl-

deerman gunboats, Commodore Sicard has no knowledge of the Nipsic having been sunk by a German torpedo, save such as is furnished by the Herald's Breslau dispatch.

Referring to the torpedo armaments of the German gunboats, Commodore Sicard

by the Herald's Breslau dispatch.

Referring to the torpedo armaments of the German guaboats, Commodore Sicard said: "The working range of these torpedoes, to be fired with accuracy, is about 400 yards. The German navy uses the Schwartz-kopff torpedo, which is made in Germany and nowhere else. It contains about 93 pounds of gunpowter, They are launched from the side of a ship, and, after being properly aimed, are snot into the water. They travel at the rate of 25 knots per hour, and if the Nipsic was within a short distance of the Oiga it would have been impossible for her to have gotten out of the way, premising that the reported engagement actually took place. If such was the case it would fare very badly with her."

Concluding, the Commodore added: "The Trenton and Vandalia must be there by this time, and if anything should have happened to the Nipsic you may rest assured they will be heard from. Admiral Kimberly is a courageous officer. He will stand no nonsense, and if there is any trouble, will give an excellent account of himself."

Commodore Harmony, Assistant Secretary of the Navy Department, was disposed to doubt the correctness of the reported sinking of the Nipsic. He said: "Of course I do not think there is any truth in the report, but upon the statement of possible conditions I make my comments. If the Oiga did bombard the town and injure American property and American citizens the commander of the Nipsic would protest first, and then, failing to secure protection to our interests, would open fire. A navi officer has all the discretion any one has. He can make war without orders, if his judgment or circumstances demand it."

To the Herald correspondent Admiral Porter said: "As I understand it, the officers who were sent down there were under instructions to be very careful and conservative, and therefore it is not likely that they were provoked into such a rupture. I don't think the report is true, for many reasons. I have noticed several sensational items in German papers of late of a disparaging

her."
Regarding the authenticity of the news of the encounter, the Herald refers to the fact that a German ship with the news might have reached Auckland within four or five days of the occurrence and cabled the fact to Germany, while the American dispatch officer stationed there by the Navy Department would be obliged to wait the arrival of the regular steamers.

NOT BELIEVED AT SAN FRANCISCO.
SAN FRANCISCO, March 8.—Great
rominence is given by the papers to the prominence is given by the papers to the rumer that an American man-of-war was sunk in Samoan waters in a fight with the German corvette Olga. While no credence is given to the report, the publication has occasioned a sensation, following the report from Keil a few days ago of a reported engagement. The fact that the name of the vessel alleged to have been sunk is omitted, adds to the disbellef in the report, but it is assumed that the vessel is the Nipsic, Capt. Mullan commanding. Capt. Schenck, Quartermaster of the United States Marine Corps, verifies the statement that the Olga was supplied with torpedoes, which is not the case with the three American war vessels dispatched to Samoa.

three American war vessels dispatched to Samoa.

The steamship Alameda, of the Oceanic line, which left here for Australia February 9th, touched at Tutulia, the southern island of the Samoan group, February 2th, and arrived at Auckland March 3d. Had any engagement occurred at Apia she would probably have learned the fact at Tutulia and carried the news to Auckland, where the fact would have been cabled. It is conceded that the information might not have reached Tutulia, as Apia is 70 miles distant, in time for the Alameda to carry the news to Auckland.

The steamship Zealander is due at this port March 16th with news from Samoa down to March 2d.

DISCREDITED AT WASHINGTON,

WASHINGTON, March 8.—The stor y of an engagement between the German man-of-war Olga and an American man-of-war in engagement between the German man-of-war Olga and an American man-of-war Olga and an American man-of-war the harbor of Apia is generally discredited at the Navy Department. No information upon the subject has been received at the Department of State. It was said that news of an event of such importance would surely have reached the United States at least as soon as a German sea coast city.

The Nipsic, which is supposed to be the American vessel referred to in the German publication, is rated as a wooden vessel of the third class, with six guns. The Vandalia and Trenton, which have doubtless reached Samoa by this time, are also wooden vessels, carrying eight and ten guns respectively in their main batternes. Most of these guns are smooth bore, but naval officers say that at short range and against unarmored vessels such as the German gunboats now in Samoan waters, these cannon are just as efficient as rifled ordnance. Unless the German gunboats have also been reinforced, the American fleet now at Apla is regarded as superior in offensive power, as its vessels are fresh from the repairers and the crews are strong in number.

Secretary Blaine, this evening, in answer to an inquiry, said that the report of a conflict between German and United States war vessels at Samoa was, in his opinion, unworthy of credence. He regarded it as a mere stock-jobbing rumor, having no foundation whatever. Commodore Walker of the Navy Department held similar views.

BERLIN, March 8.—Several papers announce that the Samoan conference will open about the 18th inst.

A PERPLEXING REPORT.

said to have taken place. This once established, it would be easy to determine whether the Nipsic was the only American vessel in the harbor at the time, or whether she had been reinforced by the arrival of the Trenton and Vandalia.

COUNTY DIVISION.

IT PASSES THE SENATE WITH A

The Settlement Involved if It Becomes a Law-Inside Points in Legislation Given Away - A nall Corruption Fund Demanded, but Not Paid.

News was received in this city yesterday by the Chamber of Commerce that the County Division Bill had just passed the Senate, and goes to the Governor for his signature at once. The vote as reported stood 30 to 7.

In a short time the news had spread all over the city, and was received with more or less disfavor. There are but few people in Los Angeles who believe that it will be beneficial to this city or the county in general. One gentle-man who has taken quite a hand in opposing the division bill said to a

"It is a pity to see the banner Re-publican county of the State cut up in this cold-blooded manner, but the peo-ple of Santa Ana seem to be anxious to

this cold-blooded manner, but the people of Senta Ana seem to be anxious to work on their own hook, and I guess we must stand it, but it will cost Los Angeles, Pasadena and the San Gabriel Valley a great deal of money for the little experiment. Of course the new Los Angeles county will have a big territory, but a large slice of it is desert land from which we can draw no revenue, and the bulk of the expense of running the government will be thrown on Los Angeles city. The Santa Ana people have a mighty rich country, but I think they will regret the step they are about to take before many years have gone by."

There are a number of people in this city who are already contemplating moving down to Santa Ana, and the chances are that before the first Orange county election takes place, at least half of the politicians, who are now hovering on the brink in this city, will move to Santa Ana and docate permanently.

There will be a strong rivalry be.

nently.

There will be a strong rivalry between Orange and Santa Ana for the county seat, but for the present Santa county seat, but for the present Santa Ana will be the county seat, if the people, who have to pass on the matter, decide to divide the county. It is hard to tell how the affair will end, for a part of the citizens of the proposed new county are not unanimous for division, and when it is remembered that it will take a two-thirds vote of the proposed county to make the bill which passed the Senate yesterday a law, it is hard to tell how the affair will come out.

out.

There are a number of people in this city who are of the opinion that the whole county should be allowed to take a vote on this all important question.

A lawyer who states that he would have fought the bill tooth and toenall is somewhat doubtful about the advis-

is somewhat doubtful about the advisability of taking such a vote as it fixes a precedent that may prove disastrous in the future. The people of Los Angeles are directly interested in the division, for if Orange is made a county they will not only have to divide what money there is in the treasury, but they will have to go into their pockets to pay the new county what she has put into the county buildings in this city. It is estimated that Orange county will take almost \$100,000 out of Los Angeles.

county will take almost \$100,000 out of Los Angeles.

The election for division must be held within 90 days from the time of the passage of the bill, and if it is carried the new county must proceed in the usual way to elect county officers.

The county balance sheet, as made out by Secretary Higgins of the Chamber of Commerce, stands about as follows:

Cash on hand (approximately)....\$ 766,000 Assessed value of county property 562,000

Present worth..... \$ 646,500

To this should be added county To this should be added county bridges, whose value at the present time it is a difficult matter to estimate. The new county would, of course, be charged back with whatever bridges or other improvements are within her borders.

The total assessed value of Los Angeles county is in round numbers \$102,000,000. Orange county will have, according to the claim of its advector.

\$102,000,000. Orange county will have, according to the claim of its advocates, \$12,000,000, although Mr. Higgins thinks it will not exceed \$7,300,000.

If the claim of Orange county's assessment is correct, they will demand a division of county resources in the proportion of 12 to 102, or between one-eighth and one-ninth. This will amount to something between \$75,000 and \$100,000, which, by the terms of the bill, Los Angeles county must pay down in cash. So large a sum cannot be taken out of current funds, and the result is that the county will be obliged to borrow money to pay the debt to the new county.

county.

If the balance had been against the new county, there is a provision in the bill which would have allowed it to fund the debt and secure time for its payment, but as matters stand the spot cash must come out of the county treas-

A QUESTION OF BOODLE.

It is an open secret that money has been used at Sacramento to carry the been used at Sacramento to carry the division bill through the Legislature. An agent who was sent up to oppose the bill brought back word that it could be defeated in the Senate by a comparatively small purse. The votewas supposed to stand nominally 19 for and 16 against. Six of the San Francisco delegation said: "If you will raise us \$300 a piece—making \$1800 altogether—we will flop over and vote against it. We would rather take your money and vote with Senator White against the bill, but if you don't come up we shall have to do the best we can for ourselves. The other fellows will pay that."

The Los Angeles gentleman to whom the nefarious proposition was submitted refused to have anything to do with it, and so the bill went through with a whoop.

Refore the people are through with this county division business they will probably find that there are several Los Angeles "smoothies" and a few San Francisco thieves at the bottom of the whole thing. There are politicians in this State who, if they would talk, could tell how they have cleaned up \$30,000 or \$40,000 on a county division election.

"How under the sun can this be division bill through the Legislature.

"How under the sun can this be done?" the innocent will ask, with eyes bulging and mouth open.

The scheme is simple and easy, and has been worked several times in this State, and is now on foot right here in Los Angeles.

There are certain interests in the section to be broken away from that will spend money to defeat the fellows who want to go off on their own hook, and these politicians are ready to work for the side that will put up the most money.

There are hundreds of vagabonds in and about Los Angeles who have no regular home. For a few dollars they will go any place, and vote just as they are told. Now, if they are colonized in Anaheim, Santa Ana, Orange, Tustin, etc., they can vote in thirty days. Some of them will be able to vote but once, but there are some who, if they are handled by educated politicians, will be able to vote two or three times on election day.

Now, as soon as these people are colonized, the strikers will start out and will sell their votes to the highest bidder. If Los Angeles wants to defeat the new county scheme, she will have to put up for it, and the same chance will be given the other fellows. The new county fellows have already demonstrated that they know how to handle a sack, and the chances are that they won't let the "bearded cattle" vote against division.

A ROBBING BILL

The Northern Cattle Kings Want

Monopoly.

There is now a bill before the Legislature that is causing the butchers of this city a great deal of trouble. It is nothing more nor less than a bill to quarantine cattle from Arizona and New Mexico.

This on its face is very simple and so innocent that but few persons would for a moment imagine that there is a great big job in it. But such is the fact, and before the people of South-ern California are through with the present Legislature they will find that they are in the hands of a band of kid-gloved highwaymen.

The excuse for the introduction of this highway robbery bill is that the cattle in Arizona and New Mexico are diseased and should not be allowed across the Colorado. This is all bosh. The cattle that come from the south are just as sound as any in the world, and the persons who got up this bill.

and the persons who got up this bill are well aware of that fact.

The whole thing is a job, and if it passes the people of Southern Cali-fornia should adopt the strongest re-

passes the people of Southern California should adopt the strongest retaliatory measures.

The bill was put up by the cattle kings of the north, who have made up their minds to gobble the cattle trade of Southern California as against Arizona and New Mexico. At present Southern California is gettling all of her meat from the south, which amounts to between \$25,000 and \$30,000 a month. Now these people know that if they can quarantine Arizona and New Mexico, the people of this end of the State will have to get their cattle from the north, and the northern cattle kings can fix their own price on beef cattle.

The whole scheme is one of the most diabolical that was ever sprung, and the chances are that it will be carried unless desperate measures are taken, for the Legislature is for sale, and the cattle kings of the north can well afford to pay \$100,000 for this territory during the next two years, or until the Legislature convenes again.

The butchers of Los Angeles were terribly worked up yesterday, and today the Board of Trade will take a hand and see what can be done to knock the rascals out.

OFF HIS BASE.

Locked Up to Prevent Him from Suiciding.

Some days ago a newspaper man named Frank Howard came up from San Diego with letters of introduction to a number of people in this city. Howard is of a rather convivial dis-position, and has been drinking heavily of late, not having been able to "catch on" here. For the past several days he has been threatening to commit suicide, and has caused his friends a suicide, and has caused his friends a great deal of trouble. Last night a young man, an acquaintance of Howard's, came to the police station, and asked to have Howard locked up for safe keeping. The young man said that Howard, by some means, had got hold of an ounce bottle of laudanum, and intended to take his own life. He said that Howard was broke, and would not work and had requested some of not work, and had requested some of the boys to write to his people and tell them what he had done, and his rea-

the boys to write to his people and tell them what he had done, and his reasons for it.

Chief Cooney sent Detectives Marsh and McCarthy after Howard, and they returned in a few minutes, bringing Howard with them. He was considerably off his base, either from drink or some other cause, but was pretty good natured and wanted to know what charge there was against him. He was told that it was for carrying a deadly weapon, which he denied, and on being searched the bottle of laudanum was found. When asked what he intended to do with the drug, he said that he was a sufferer from toothache, but an examination of his mouth showed that his teeth were all right, and when this fact was called to his attention he attempted to laugh it off by saying that he was troubled with insomnia, and wanted the medicine to produce sleep. He finally managed to get it through his head that his wild talk had been reported at the station, which was the cause of his being brought in. Howard was given lodgings for the night and his sanity will be looked into today or tomorrow.

DEDICATION.

Calvary Presbyterian Church of Pasadena.

The services in connection with the dedication of Calvary Presbyterian Church, Pasadena (Rev. Albert Mc-Calla, pastor), will be held at 3:30 p.m.

Rev. J. L. Russell of the First Pres byterian Church of this city will preach the sermon. Rev. A. M. Merwin will offer the prayer of dedication

win will offer the prayer of dedication and other ministers will take part in the services, which are expected to be of special interest.

The church is situated on Columbia street near Orange Grove avenue, and not far from the Raymond Hotel. It is substantially built and well finished and will seat about 200. It is lighted with gas and its walls frescoed in good taste.

with gas and its walls frescoed in good taste.

Those who attend the services will have the unique experience of a church dedication without a debt-raising, as, thanks chiefly to the generous liberality of Mr. Williell Thomson and wife of Pasadena, to whose large gifts and untiring energy the new edifice is largely due, and to the kind aid of the Presbyterian Board of Church Erection, the church is free from debt or lien, and can open its doors to all with a free and hearty invitation.

Sunday Labor Meeting. The labor meeting next Sunday will have several new features, amongst others a petition will be circulated asking the new Council to have all the see politicians are ready to work to side that will put up the most to be entirely by work, the brick to be entirely by white labor and the lime to be burnt entirely in Los Angeles county. It is expected that the petition will be a big one.

THE CRAZE.

PEOPLE STILL STRIKING OUT FOR THE MINES.

While Reports Show That Some Who Have Already Reached the Goal Are Going Hungry -Embryotic Miners with Chaotic

The mining excitement still keeps up. If anything it is growing more in-tense each day. All along Spring street yesterday excited groups of men might have been found discussing the situation and trying to devise ways and means for reaching the diggings There are hundreds of men in this city who are anxious to go the mines, but they cannot gather up money enough to get an outfit and pay their fare

down.

All day yesterday Maj. Furrey's force was busily engaged at his shop in turning out pans for gold washing. He put all the men he could get hold of to work, and late in the arternoon men with flannel shirts and a broad grin on their faces might have been seen marching out of the store with big pans on their shoulders. It costs about \$40 to get an outlit, pay one fare to the mines and lay in ten days' provisions. This makes the trip something of a burden for a great many people who have not been at work for some time.

The mines have been worked a little over three weeks now, and yet the reports are coming in thick and fast to the effect that there is aiready a great deal of suffering among people who rushed to the diggings without means or provisions, and since their arrival there they have not been able to take out gold dust enough to pay their running expenses. While some have happened to get hold of claims that pay well, there are hundreds who are wandering about doing nothing. This is rather early in the day for suffering from hunger, but it should be remembered that living at such a place costs a small fortune, and people who go there should either take provisions or money enough to pay \$5 or \$6 a day for their living while they are there.

Yesterday afternoon Ed Burlingame sent off two carleads of horses and wagons in charge of George D. Roberts. The wagons will be used in carrying freight and passengers between Tia Juana and the mines.

Mr. Ivinson, senior member of the firm of Ivinson & Co., bankers of Ensenada, was seen at the Brewster last evening. He states that no gold has so far been brought to his notice, and none has been brought to the bank. Ensenada wears a deserted appearance, half of the inhabitants having left. It may be too early yet, he said, for gold to be brought in, but there must be some foundation for all the talk. He did not think the placers would last, but it would be a rich quartz-producing country. Things were very expensive at the mines, according to the reports brought in. Coffee was worth \$1 per pound, sugar \$1.25, plug of tobacco \$1, and the other things in proportion. It would be wise to either take a good stock of provisions along or lots of money.

Some bourd incidents happen right along. Then the bidders get into squabbles mong themselves they resort to all orts of mathematical contortions to eat their rivals and secure the proprty under the hammer. The proprty is knocked down to the lowest idder, and on many occasions yesterally bidders went over the whole arithmetical table, bidding the billionth art of a trillionth, and the illionth part of that. The knowledge of "figgers" shown by some the "fiends" present was startling, and it behooves every one who has roperty on the delinquent list to pay four from the dutches of such thoroughly-posted land-grabbers.

The work of paying in by delinquents goes steadly forward, and it is believed by the Collector's deputies that, the amount of delinquent taxes this year, when he matter is rounded up, will amount to many thousand deling less that last. They estimate the amount at \$25,000 or \$30,000 less than last year.

Yesterday the collections from delinquent taxes pid in, thus removing the property fam the list, was about \$500. The Colletor got through with volume 3 and started on volume 34, which is the lagest volume in the office. The sale vill be resumed today.

The girl was found ad brought back, and, as she was onl about 13 years of age, she was not prosecuted, but was given another chance. Nothing more was heard abot Sarana until three or four days ag, when she went to the City of hirs dry goods store, on Spring street, by representing that she was sent by Ms. Covarrubias, secured a lot of fine dres goods and other articles, when she agin dropped out of sight and went into Liwis's shoe store and secured a pairof fine shoes. As the thing was getting to be decidedly monotonous, larana's latest exploit was reported at police headquarters, an there apparently being no hops of reclaiming the girl, the request was made that she be taken isto custody. Officer Sanchez, who knew the girl, started out to look her up, and yesterday afternoon she wasfound in a house on Alameda street, where she has been hiding for the past three days. Sarana objected very strongly to going with the officer, and insisted that she was a married woman, saying that the wedding tok place Thursday night. She was brught along, however, just the same, and last night staid at the City Prison

Althoughput 13 years of age, the girl is well developed, and is rather attractive boking. She appears, however, to be either a kleptomaniac or altogether lad, and will be prosecuted for her numerous thefts.

THE FLAG COTTAGE.

A Determination to Close the Place

Up.
Public opinion was considerably worked up over the Flag Cottage raid yesterday, and many citizens expressed a determination to do all in their ower to assist in the conviction of the people who have conducted the disreputable "joint." The Board of upervisors was made acquainted with the facts of the arrest by Sheriff Aguirre Thursday night, and its mem-bers expressed themselves as being highly pleased. They passed a reso-lution authorizing the employment of Henry T. Gage to assist in the prose-

Henry T. Gage to assist in the prosecution.

Fresh evidence is coming in against McCormick and his wife. It seems that a number of young men have been ruined financially in this place, and it is said that on the trial of the case it will be shown that the woman has been in the habit of driving about town fer the purpose of plaking up young girls. If this can be shown several other charges should be brought against the couple. The Supervisors have made up their minds to wipe the cottage out even if they have to arrest the couple severy day for a month, and if that does not shut them up they will then raid the place whenever there are visitors in the house.

An Employment Agent's Trouble.

Last night Mrs. Kearney, the keeper of the employment office, where the woman Annie Schaffer claimed to have been victimized, called at the Trans office to say that she claimed to be the victim, instead of the victimizer. Mrs. Kearney says the girl did not keep her contract, and therefore had no claim upon her to refund the money, \$1.80, which she had paid, but that she only gave it back to her to keep from being brought into notoriety through fighting the case. Mrs. Kearney also brought the printed contract with her to show that she had fully carried out all that she had promised in the premises.

Taking It to the Supreme Court.
There is not much doubt that T. J.
Cuddy, who is now in the County Jail
for six months for tampering with a
juror in the United States Court, will
attempt to secure a more partial view
of his case than that given by United

States District Judge Ross. He has had one or two sets of attorneys since the eventful day on which he burnt his fingers before the court. Yesterday a third relay was at work. Messrs. Anderson, Fitzgerald and Anderson have been retained to bring the matter before the United States Supreme Court on writ of habeas corpus. Mr. Cuddy has said that the case would be taken up to the higher tribunal, and Mr. Anderson was engaged yesterday in the Clerk's office of the United States Court, looking up the evidence and documents in the case, preparatory to taking the necessary steps. Should the case go to the Supreme Court it is probable that District Attorney-General in representing the Government.

The Value of a Boy's Leg.
In the case of J. Coyle Barrett vs.
the Southern Pacific Railroad Company, before Judge Van Dyke yesterday, the jury awarded a verdict for the day, the jury awarded a verdict for the plaintiff, assessing the damages at \$390. The case is a peculiar one in that it, to a certain extent, fixes the value of: a boy's leg. The plaintiff, Barrett, is a boy 8 years of age. In playing about the railroad turntable at Santa Barbara, he injured his leg so that it had to be amputated. His mother then sued the railroad company for \$4200 for damages sustained by reason of the loss of the boy's services, which amount the jury scaled, as above stated, to \$300.

It Was No Joke.

In the case of A. M. Scott, the young man who held up Mr. Adams, the gunsmith, on the Downey avenue road Sunday, and who was tried on a charge Sunday, and who was tried on a charge of exhibiting a deadly weapon Thursday, Justice Austin yesterday announced his decision, finding Scott guilty as charged, and ordering him to appear for sentence this morning at 9:30 o'clock. Scott, it is said, claims that he will appeal his case if he thinks the sentence is too severe.

The Mechanics' Lien Law. Yesterday Judge Wade's depart-ment of the Superior Court was occu-pied with mechanics' lien cases. With he case of the Willamette Steam Mill and Lumber Company vs. the Los Angeles College Company as a basis, there were nine similar cases consoli-dated and tried as one. The day was spent in hearing testimony, and the cases were finally submitted to the court for action.

A Careless Driver.

Charles Schrader was yesterday fined \$10 by Justice Austin for careless driving. Schrader is the man who ran down and badly injured a colored hotel-runner named Reuben Williams, at the Southern Pacific depot Thursday morning. Another complaint has been filed against Schrader charging him with battery, which will be tried at a future date.

CATARRH Throat Diseases, Bronchitis, Asthma,

CONSUMPTION, Together with diseases of THE EYE, EAR AND HEART,

SUCCESSFULLY TREATED BY HILTON WILLIAMS M. D., M. C. P. S. O.,

HOLLENBECK BLOCK. Corner of Spring and Second Streets, LOS ANGELES, CAL.

Consumption Can Be Cured

or cases treated by

DR. WILLIAMS.

With his new system of medicated inhalationa.
also the crygen and compound oxygen treatment, combined with proper constitutional remedies for the liver, stomach, blood, etc.

Probably no system of practice ever adopted has been so universally successful as that introduced by Dr. Williams for the cure of Catarrh, Throat Disenses, Bronchitis, Asthma and Consumption.

nas ocean so universally successful as that involuced by Dr. Williams for the cure of Catarrh, Throat Diseases, Bronchitis, Asthma and Consumption.

Catarrh is offer exarded by the patient as a cold in the head, and he often expresses his astonishment at his remarkable tendency to contract a fresh cold. Indeed, he declares he is searcely free from one cold before he takes another; and he is aiways exceedingly careful. It is also a matter of surprise to bim that the cold always seems to settle in the head and throat.

At times many of the symptoms of Catarrh may seem to abate, and the patient is led to hope that the discase is about to wear off; but another class of symptoms soon appear, and he learns to his horror that instead of recovery from the discase it is somewhat changed in its character and has extended to the throat. A sense of weariness is sometimes felt in reading, speaking or singing, hoarseness at times occurs, a sensation of dryness that some foreign aubstance, as, for instance, a hair, obstructed the throat; there becomes that some foreign aubstance, as, for instance, a hair, obstructed the throat; there becomes a sense of languor and fatigue, the breath lessens upon a little exertion, a short, backing cough, a peculiar sound in clearing the throat. a feeling as though there was not room enough in the chest to breathe; these and other symptoms cocur after the discase has made considerable progress. Then it is a time when consumption is about to begin its dreadful work. Up to this point the progress of the disease may have been slow, and the patient may, in expressing his confident hope that it will "wear off," declare that he has had the datarth for years, and has not seemed the become much wore, and trusts he will "by a confident hope that it will "wear off," declare that he has had the catarth for years, and has not seemed the head of the captiratory organs, and trusts he will "by a confident hope that it will "wear off," declare that he has had the catarth for years, and has not seemed the hea

for each individual case as they severally require.

By the employment of proper inhalation in the form of medicated vapor (not steam or stray) we are able to produce immediate and direct action upon the diseased surface in the pharnyx and massi passages, for air will find ta way into the most remote and intricate cavities, where it is impossible to make fluid applications. By these means every case can be oured.

Persons desiring treatment by this system of practice can use the remedies at home as well as at our office, and which will cause no inconvenience or hindrance to business whatever, are constant of these cases.

The very best references from those already cured.

THE latest spiteful scheme on the part of the northern citrus belters is disclosed in today's TIMES, the plan being nothing less than a bill to quar-antine cattle from Arizona and New Mexico, thus throwing the southern cattle business into the hands of Northern California cattlemen. As a theirs, or to recognize them as men fact. Arizona cattle are far more healthy than those from the northern part of the State, numbers of which are known to be badly infected with anthrax. In view of the fact that a major portion of the present Legislature is for sale cheap, and that the northern members would rather hurt Southern California than not, there will probably be little trouble about passing the bill, unless our people take very speedy and decisive steps to

ADVERTISING THE STATE.

The traveling exhibition of Califor-ia—that is of Northern California products is still attracting much attention in the East. The exhibition cars are now in Northern Ohio. are going through to New York and then up into Maine as far as Bangor. On the return trip the Baltimore and Ohio road has offered the cars free transportation. The choice of this oute will take the show through Philadelphia, Baltimore, Wheeling, Cincinnati and the many populous smaller cities and towns intervening. From Cincinnati the exhibition will probably return to Chicago, then go by the Illinois Central to New Orleans and come west by the Southern Pacific Sunset route. According to present plans the cars will be back in San Francisco by the middle of June.

The State Board of Trade has been invited to make a grand exhibit in Milwaukee next September at the annual Grand Army Encampment. The old soldiers were so well pleased with the attractive display at Columbus last year that they ask for this feature of the encampment again. The Columbus exhibition was cer tainly of great benefit to California. but it was an undertaking of considermagnitude. The matter has been referred to the new Grand Commander of the California Grand Army of the Republic, Gen. George Gard of Los Angeles. If an exhibit is thought desirable, he will appoint a number of Grand Army men to act with the State Board people. The managers of the Milwaukee Encampment have guaranteed ample space for an exhibition free of charge.

The scheme to send three Pullman cars filled with California produce through Great Britain is being discussed. The plan would be to send the products from California to New Orleans, and thence by steamer to Liverpool, where the cars would be in readiness to receive them. English railroad superintendents have written to on the subject. The San Francisco Bulletin gives the following further information regarding the ob jects of the proposed traveling exhibi-

ion:

As planned, this traveling display of California would not be solely for immigration purposes, but would also endeavor to stimulate trade in exhibiting goods of value to residents of Britain. The display of fine wines would be a feature and a quantity of choice wine in small packages would be distributed gratia. A similar pian would be followed with brandy, olive oil, dried and preserved fruits, raisins and some other articles. Each small package given out would bear the name and address of the producer or dealer, so that if the recipient were pleased he would know where he could secure more "at reasonable market rates." Nothing would be sold from the cars. It is considered that in this way the exhibition, moving through the great centers of trade of England, would work results in their way similar to those hoped for from the London exhibition project recently before the Legislature.

These projects are all arranged by tion:

These projects are all arranged by the State Board of Trade, which is supposed to be working for the whole State—at least it works with money contributed by the whole State but, as a fact, Southern Califor-nia is almost entirely ignored, if not misrepresented, in these exhibitions. We cannot afford to give up advertising entirely. If we do we shall find ourselves left out in the cold. Either we must secure repreentation in these schemes or run a show of our own.

"HONORABLE" MEN.

The Orange County Bill has passed the Senate, and now awaits the Governor's signature. Should he sign it, the people residing within the limits of the proposed new county will vote on it, for or against, a two-thirds vote being necessary to carry. It is not altogether sure that such a majority could be secured. The taxpayers will reflect before they entail upon themcounty will necessarily involve.

In connection with this bill despicable job has come to the surface, showing what character of men many of our State legislators are. It seems that a man was sent up from this city to Sacramento to oppose the county division bill, the sum of \$500 having been contributed toward his expenses. He accomplished nothing, beyond sending down an offer to se cure the votes of six Senators against the bill for \$300 each, or \$1800 altogether. These noble Senators stated that they would rather vote against the bill than for it, other things being equal; the natural inference that they had offers of coin to vote

We have been fond of criticising the Arizona legislatures, but really this California Legislature of ours is not one whit better. The few honest men it contains only establish the fact that the majority are rogues—legislative highwaymen, paid by the people to do their work, and yet demanding blood money before they will carry out the people's will. Such scoundrelly, venal politicians as these are a disgrace to a republican form of government. They play into the hands of anarchists. enabling them to point to the fact that money alone makes laws, and by thus strengthening the hands of desperadoes, hasten the day when Anarchy shall try its strength against law, and the blood of many innocent persons

Such men, who seek positions of honor in order to sell themselves for sordid gain, should be branded by all honest men and journals, as the Almighty once branded Cain, so that they may henceforth be avoided by all who retain their self-respect.

If we cannot at once weed out the rogues, let us, at least, have the couramongst men, even though they may dress in broadcloth and ride in car-Venality will become disreputable just as soon as honest men com bine to make it so.

Let us boycott the boodlers!

THE Boston Journal of the 2d con-

tains the following:
One of the most-striking features in the
Cabinet situation appears to be that until
the arrival of Gen. Harrison in this city, at
least, Mr. Blaine had not been a factor in
the cast of the Cabinet, however much

this statement may conflict with the general belief which has been entertained since the election, and particularly since the name of Mr. Blaine was accepted at the new Secretary of State. It has been learned from a person very near to Gen. Harrison that Mr. Blaine, up to the time that the President-elect arrived in Washington, had not been consulted as to any member of the Cabinet.

RULED BY A RING.

Why Waterman Vetoed the Insurance Bill.

THE Republican City Central Com mittee yesterday took upon itself to formulate a list of men whom it wishes to see appointed to various municipal positions. The R.C.C.C. is making positions. The R.C.C. is making itself somewhat too officious. The new City Council was elected by the people, and it is responsible to the people, not to the Central Committee, or to any other political organization.

THERE is no need to go so far as Lower California for gold. There is plenty of the yellow metal around San Gabriel, San Fernando and other places along the Sierra Madres, from which thousands of dollars have been taken out in years gone by. But, then, "distance lends enchantment."

AMUSEMENTS.

AT THE OPERA-HOUSE .- A Poor Rela tion was given again last night to a good and enthusiastic house. Tonight Bewitched will be given. Although Mr. Russell has been many times in San Francisco, this is his first visit to this city, but he bids fair to make for himself a warm welcome.

THE LOS ANGELES THEATER.—Mme. Helené Modjeska made her final appearance at the matinée yesterday afternoon, as Mary Stuart. Nothing could be more sad or more sweet to remember than the beautiful, chastened face of this unhappy Queen, who, having done with earth, seems indeed already of heavenly.

A MANIAC.

An Unfortunate Kanaka from San Pedro.

Yesterday afternoon a crazy woman was brought up from San Pedro, and confined in the County Jail. The commitment gives the name of F. Webber and she is charged with disturbing the peace, but this is explained by the officer who brought the woman up saying that the Justice had no insane blanks and consequently did the best he could and consequently did the best he could. The woman is supposed to be a Kanaka, and has been a prostitute about San Pedro for some time past. She is said to be a very dangerous character, and it is claimed that she cut a man very badly some time ago, and that she also slashed a woman of whom she was jealous. The woman was comparatively quiet at the jail until last night, when she became very violent, and tively quiet at the jail until last night, when she became very violent, and tore all the clothing from her person. The other women were afraid to have her remain in their department during the night, and about 9 o'clock Deputies Hunter and Wray transferred her to the "crazy" cell, after a severe struggle, during which Mr. Hunter was bitten on the hand by the woman, who seemed to have the strength of half a dozen men, and fought like a tigress. She was finally strapped so that she could not use her hands, and was then carried down stairs, when mufflers were put on her and she was wrapped in a blanket. The jailers had to sit up all night watching the woman to prevent her injuring herself, as she showed a decided tendency to but her brains out against the wall, and there is no padded cell in the jail cided tendency to butt her brains out against the wall, and there is no padded cell in the jail for such cases, which should receive the attention of the Supervisors at once. No one about the jail could understand the woman, as she spoke a patois, in which Spanish, English, French and Italian were badly mixed up with a jargon that no one had ever heard before. The woman will probably be examined today, and at once sent up to Stockton.

A few minutes later he had occasion to look for something in his pants pocket, when he discovered that the covered that his pants pocket, when he discovered that the garment hanging up where he had left his was not his own. He then went to Higgins's room, and found that worthy curled up in bed with the missing trousers on, he having slipped into his room during his absence and made the change. This was something that Higgins could not explain, and he owned up, when Officer Collins was called, and took him in charge, locking him up on a charge of petty larceny.

Shot Himself by Accident. Last evening a young Mexican named Jim Green was with a crowd of boys on Upper Main street, near the city pound, and was fooling with a revolver. It was the same old story of accidental shooting. The shot took effect in his ankle just above the foot. He walked down to 3041 North Main street, where Dr. Choate probed for the bullet, but could not find it. It was ascertained that the bullet had rebounded from the bone and had come out of the same hole it had entered. Afterward the bullet was found upon the spot where the shot was fired. Green's wound was dressed, and he was put to bed. He will be laid up for a few days. city pound, and was fooling with a re-

Aspirants for Office-Who They Are -What They Want.

San Francisco Papers Not Inclined to Credit the Reports from Lower California - Notes from the Bay.

By Telegraph to The Times.

SAN FRANCISCO, March 8.-[Special.] The journals of this city generally disapprove the Governor's veto of the Mutual Insurance Bill. The substance of the bill is already familiar to Times readers. It merely provides that 25 or more property-hoiders, possessing over \$25,000, may com-bine to insure each other against loss by fire. The idea that Waterman vetoed office to insure each other against loss by fire. The idea that Waterman vetoed the bill for the reason given in his message, namely, that it was not passed by a constitutional majority, is scouted here. The true reason is freely charged to be that he was influenced by Bornek, acting as the servant of the insurance ring. The vetoed servant of the insurance ring. The vetoed measure was for the protection of property-owners against this ring. Insurance in California costs vastly more than in New York and other Eastern States, because the lasurance combine has continually pushed uprates to extortionate figures.

The Post declares that "San Francisco in a bad year for fires paid the companies in premiums five times the amount paid her in losses by the insurance companies. In ordinary years the premiums are eight times the loss."

The Post goes on to say: "The Mutual

times the loss."

The Post goes on to say: "The Mutual Insurance Bill enabled merchants to escape this tribute if they wished. For this reason the compact fought it. For this reason the Governor has vetoed it. The Post has Governor has vetoed it. The Post has heretofore defended Waterman from his critics. When he has been represented as the weak tool of an unscrupulous and cor-rupt secretary it had believed the criticism unjust. Waterman has now proved what his enemies have charged, that Waterhis enemies have charged, that Water-man's secretary has long been a hanger-on of the insurance ring. The 'horse' paper published over his name depands on the advertising of insurance companies for profits. It has acted as one of the organs of the trust. The completeness of the chain between the trust and the flowerner is shown by the appointment of Governor is shown by the appointment of the insurance compact's hired attorney for Insurance Commissioner and the veto of the Mutual Insurance Bill. Waterman has been represented as planning for a renomination for the Governorship next year. H may as well understand now that his chance is gone. If he will listen to the comment of the people, that has preceded the comment of the press in this instance, he will find that he is not the kind of a man the Republican party will nominate a sec-oad time, and if he should by chance suc-ced in bringing politicians to nominate him, he will lead the party to the most ignominious and disastrous defeat it has had in the State."

MINING STORIES DISCREDITED. The papers generally discredit the mining om Lower California, and discour age any movement council a "rush" in that direction. Some show suspicious zeal in beliefing news of the Santa Clara gold find. The Daily Report makes a particularly victous assault on the idea of the peninsula ielding up anything valuable in the way

Late in the day the following cable was received from London: "Operators in London predict that the end of the copper trust is near. Any scheme devised to keep it up in the eyes of the public is merely a process to arrange for easier liquidation. It is apparent that these securities have been forced by artificial means upon the continental markets, and heavy realizing is inevitable." In reference to the situation a promigent bear operator whe at one time held very close relations with the syndicate prophesied the early downfall of the French corporation. He argued that even if all the mues stopped producing it would not change the result, as the present stock was far in excess of the consumption. The failure of the syndicate, he thought, would not materially affect the American market.

John Stanton, treasurer of the Central Mining Company, one of the American mines with which the syndicate contracted, expressed belief in the solidity of the syndicate. The Bank of France, Stanton added, would certainly not make money advances in excess of the value of the copperheld as security.

YORK (Pa.), March S.—A pronounced carthquake shock was felt here this evening at 6:40, which had the effect of frightening nearly everybody in the citys-Houses trembled for nearly a minute, and articles of furniture moved. The citizens thought an explosion or some such accident had happened. There was a loud report, with very distinct vibrations, and it was the most violent shock ever felt here. Women ran shricking from their houses with infants in their arms, and for a while in some sections of the city excitement was intense. No damage resulted here.

BALTIMORE, March 8.—Reports from towns throughout the northern and western portions of Maryland give accounts of a severe earthquake that was felt about hait past 7 o'clock tonight, in Carroll, Baltimore, Harford and Cecil counties. The effect of the shock was quite perceptible. Windews rattled sharply, and crockery was thrown from shelves. In the town of Winchester a number of women were badly frightened by its wave, and rushed panic stricken from their houses. The shock was felt slightly in the northern portion of this city, but no damage is known to have resulted. The wave seemed to be traveling in a southerly direction.

Harrisburg (Pa.), March 8.—A distinct earthquake shock was felt this evening between 6 and 7 o'clock in this city and vicinity.

A BIG BLAZE.

Costly Fire at Louisville, Ky.—Heavy

Louisville (Ky.), March &—[By the Associated Press.] Fire broke out at noon today in the basement of Kleinhaus & Simonson's clothing-house, on West Market street. In 15 minutes the blaze had spread through three large stores and was leaping through the roof. Soon after the roof fell, and a little later two large sections of the side wails. With one of these the rear of H. Strauss's dry goods house went. It seemed inevitable that the block should all burn. After a hard fight, however, the firemen gained control and confined the flames to the Strauss place. Kleinhaus & Simonson's loss on stock is \$285,000; on buildings, \$67,000; on the Newcome building, \$25,000; on Strauss's block, \$40,000; on the Churchill building, \$6000. The insurance amounts to \$255,277.

On Tascott's Trail. CHICAGO, March 8.—It is stated that a clew has been discovered regarding Tascott, the supposed murderer of millionaire Snell, sufficiently promising to induce a journey and personal investigation by the dead man's so-in-law. It is said, he in company with a detective, is now following the trail, which Chief of Police Hubbard says is very promising, but no definite information as to the whereabouts of the party can be obtained.

itor of The Times.] In the interests of justice I would like to say a few words in regard to the so-called trial of Miss Lillian Bowers for cruelly beating one of her scholars.

That the boy was cruelly and unmercifully beaten a dozen witnesses could testify, who saw the marks left by the rawhide on his tender flesh. Had the trial taken place a week before, the boy's flesh itself would have testified in unmistakable terms the severity of the punishment.

It is a significant fact that the defense did not try to prove the innocence of the charges, but dwelt largely on the idea that "if we find the person guilty, it will demoralize the

largely on the idea that "if we find the person guilty, it will demoralize the whole school system." We must sustain the action of our teachers in order to establish a precedent.

While we believe in sustaining the discipline of our schools, if it is to be maintained only by the use of the rawide, the sconer the whole system is revolutionized the better. Had such cruelty been inflicted by an angry parent or guardian, it would have been a case for the Humane Society. Indeed might not the result have been different had the victim been the son of an influential citizen? ential citizen?

AN INVENTOR DEAD.

Capt. Ericsson of Monitor Fan His Remarkable Career. NEW YORK, March 8.—[By the Associated Press.] Capt. John Ericsson, the engineer who designed the tronclad Monitor, died this morning, aged 86 years. He had been ill only a week.

had been ill only a week.

Ericsson was a native of Sweden. At the age of 10 he constructed a miniature sawmill and pumping machine that attracted great attention in that country at the time. At 17 he entered the Swedish army as an ensign, and rapidly received promotion for ingenuity displayed in getting up plans of fortifications and maps. During his early life he was to Europe what Edison is to America. He invented in three years 40 different mechanical contrivances, two-thirds of which were patented. In 1839 he came to America, and in 1841 began to build the Princeton, the first naval vessel that ever carried her machinery under the water line, out of reach of hostile shot. This vessel dictated reconstruction to the fleets of the world. The device of a turret ship had been offered by Ericsson, in 1854, to Napoleon III., and in the fall of 1851 Ericsson proposed it to our Navy De partment. By extraordinary energy and executive skill the Monitor was launched with steam machinery complete, 100 days from the laying of the keel, and arrived in Hampton Roads March 9, 1862, just in time to defeate the Confederate ironclad Merrimac. But for the Monitor the whole aspect of the war might have been changed and European interference attempted. The variety of Capt. Kriesson's work is only less remarkable than its intrinsic importance. His inventive genius has brought out new discoveries in every department of mechanics, and he has received honors from every country in the world.

PITTSBURGH, March 8.—[By the Associated Press.] A dispatch from Butler, Pa., says the inspector of the Soldiers' Orphans' Home at McAllisterville has completed his report regarding the "crazy" boys at that institution. The report is very singular and interesting. The boys were shamming. They have all confessed, to the confusion of the wise doctors who diagnosed the cases. The inspector has written the confession of four boys who played crazy. Gus Spitter was their leader, and originated the plan. The boys in their confessions say the motives inspiring them were to have fun and have their meals carried to them. Their ages range from 10 to 18.

The Analysis

And report of the eminent Chicago chemist, C. Gilbert Wheeler, shows a remarkable similarity in the ingredients of the Coronado and Wisconsin Waukesha waters; he says that in fact their medicinal properties are almost identical. There is one thing, however, in favor of the Coronado Waukesha Springs: They contain but one-half of the organic matter found in the Wisconsin Waukesha. Thus, while they are possessed of the -ame sixtues in KIDNEY AND BLADDER TWOULDED BLES, the Coronado is absolutely the purer water. Cheap Lands. Good Lands. Prices

and Terms to Encourage Settlers. and Terms to Enceurage Settlers.

So much has been said and written about the high prices for ordinary farming and fruit land in Southern California that many Bastern people think that no good land can be had at less than \$200 per acre in any good locality. But if you will call at the headquarters of Simi Land and Water Company you will find that you can buy well watered stock ranges at \$5 to \$10 per acre, and overy one of these ranges contains more or less good farming land. You can buy first-lass valley lands for \$30 to \$73 per acre, and sawail tracts of \$10, 20 or \$6 acres, for truit farms, at about the same price. Colonies who want from 1000 to \$600 acres con be placed on fine lands, suitable \$10 per acre. This company cares nothing for \$10 per acre. This company cares nothing for booms, and asks no idfaired prices for their lands. We own nearly \$100,000 acres, and have a perfect and undisputed title. The object is to furnish good lands, to aqual settlers, at prices within reach of any who can buy land at all, and on terms which will enable men of moderate means to acquire homes in as attractive and healthful part of Southern California. We do not olaim to have the best land in the State, and at present are not directly on a railroad, but expect to be before long. But we do claim to offer better land and more advantages and on easier terms of payment than any other places that has been brought to our notice. It will cost you nothing but a postal card to get detailed information about these lands. If you want a farm or a stock range write or call at 19 West Fires street, los Angeles, and ask about the Simirands.

ATTENTION! Cheap Land -:- Good Land

The author of so much shame is the subject of a great deal of harsh criticism, but through it all there runs a vein of pity. The Evening Star, which took upon itself the task of announc-ing the fact that THE TIMES would be sued for libel, this evening has nothing to say at all in the matter. It is the popular opinion that the ex-president will quietly fold his tent and leave at once for his former residence, a city in the East. The truth seems to have

the East. The truth seems to have been so thoroughly assured, that a complete ventilation of the facts would reveal something tending to implicate still deeper, rather than free its author. In connection with this affair a reporter of one of the local dailies hurriedly glanced at the exposé, and, striking out for the home of a certain well-known society lady in the western part of the town proceeded at ones to well-known society lady in the western part of the town, proceeded at once to pump that young miss regarding all she knew about the affair. In a very few words that pencil pusher was informed that he was on the wrong scent, and that unless he made himself scarce in that vicinity, he would be ejected in faster time than made by an Altadena engine. He left. This is how the story originated as to what young lady was meant as being the victim of the disgraceful episode mentioned in The Times. The Star editorially says: torially says:

The correspondent who wrote the highly flavored sensation on Pasadena in thi morning's Times has not yet seen the en of his contemptible work. A suit of feath ers would be about his size.

The Union in reply says: It was rather funny reading in the Starlast night, when that paper rot on its hind legs and suggested a feather coat for the author of the Times scandal. Dees it Pay?

Three-fourths of our people are troubled form or other, which by nature of the disease has a depressing influence on the miad or body 'preventing them from thinking or acting clearly in any matter of importance, indigestion, coming up of food after eating, dyspepsia, sick headache, acidity of the stomach or any derangement of the stomach or any derangement of the stomach or liver (upon which the whole action of our system depends) are speedily and effectually overcome by the use of Green's August Flower. The most stubborn cases have yielded to its influence, as thousands of letters received will testify. The immense sale of this medicine is another guarantee of its merits (over a million and a half bottles sold last year). So we ask, will it pay you to suffer from any of the above diseases when you can have immediate relief in the adagust Flower? Three does will prove its worth. It is sold by all druggists and general dealers in the world.

Ocean Palaces.

The steamships Queen of the Pacific, Santa Rosa and City of Puebla excel in their appointments and speed anything affoat in this country; and for comfort and convenience, are abead of the transatiantic lines. Eastern tourists should treat themselves to a run up the coast. The voyage is usually smooth and delightful. A trip to San Lully Shispe and a ride over the Pacific Coast Railway, through the beautiful Aviia Caffon, the Arroyo Grande and Santa Maria valleys, to Los Olivos (the home of the olive), is most enjoyable.

joyable.

Lowe Gas and Electric Co.

Funds to be used for the further extension of the Company's plant, and street mains to va-rious parts of the city including several large sections not now suspiled with gas. The past year's business of the Company has shown its ability to supply the public with a very Superior Quality of Gas for Both

Light and Fuel! At such rates that all can use it, and at the same time return satisfactory profits to the holders of its securities. The fact that gas is one of the prime necessities of the people, make this business good even in dull times, and hence the reason why investors generally give preference to this class of securities.

The London Economist, in a recent number, states that, "after a lone and careful investigation as to the best paying and safest investigation as to the best paying and safest investigents presented during the past 50 years, cas

HALF ITS TRUE VALUE.

I want money and will sell this most desirable property at a big sacrifice for a short time only.

No better spot for a home. Fine foothill soil, splendid view, pure water, no frost; only 6 miles from Los Angeles Postoffice.

I mean business. You will never have another such opportunity. Come and see me and get a map of the beautiful foothills from Los Angeles to Santa Monica free.

A BARGAIN-6 choice lots in University tract; price, \$750 to \$950.

H, H. WILCOX. ORANGE LAND. NO EXPERIMENT.

A company of Chicago, Los Angeles and Riverside espitalists are now planting out a sholce strip of land in the Sauta Clara Valley with orange trees. This land is located at "Sespe," fifty-four (64) miles from Los Angeles, on the Southern Psofile Railroad. The soil, olimate and surroundings approach nearer to the famous Riverside orange tract than any other portion of the State.

The trees now here bearing fruit prefet in overy particular.

There are still one hundred acres of choice orange land that will be sold at one-half the schedule price, and trees furnished at cost for planting out. - Arrangements can be made to have them cared for at setual cost till the bearing period.

This opportunity is open till the trees are all planted. After that the land will be held at schedule price and the value of trees added. Terms of payment are very liberal. So favorable an opportunity of owning a choice orange grove at a low rice, in a good neighforhood, cannot be mot with every day. The man who decides quickly will get the best. Apply to

Francis Bates, Secretary Sespe Land & Water Co., Room 12, No. 138 West First Street. TO CAPITALISTS.

For a short time we offer for sale the famous "Las Penasquitas" ranch sixteen miles from San Dego city, comprising about seven thousand acres, feaced and cross-fenced. One thousand acres of it produces annually a heavy volunteer crop of oats.

Most of the land is smooth and suitable for vineyards. The adjoining town and valley of Poway are producing the finest raisin grapts in the State. free from all disease.

Never-falling springs supply water for stock, irrigation and domestic use.

The improvements consist of a large filteen-room ranch house, large barn, carriage, tool and chicken house, corrals etc.; also orchard of two hundred and fifty bearing orange trees filled with fruit, also peer, peach, prune and oives in bearing; vineyard of two varieties of grapes in full bearing; rare plants surround the house and grounds.

For stock purposes this ranch can be made to pay large interest, and when subdivided will give immense opportunities.

The nlace is offered as a whole for \$25 per acre all through, or a three-fiths interest will be sold at a silght advance.
